

Risk Management Course

Proactive Management of risk in accordance with ISO 31000 and PMBoK

Overview

Risk management is the identification, assessment, and prioritization of risks with a coordinated and economical application of resources to minimize, monitor and control the probability and/or impact of negative events or to maximize the realization of opportunities.

The course is based upon ISO 31000, A guide to the project management body of knowledge (PMBOK® guide) Fifth edition, Risk management and risk management units of 2013 (Certificate IV & Diploma) and 2007 (Advanced Diploma) Business Services Training Package/ Innovation and Business Skills Australia.

Participants apply risk management tools and processes to their organisation, business unit, portfolio, program or project, as appropriate.

Benefits of risk management:

- improved planning, control & governance
- optimised decision-making
- identification of opportunities and threats
- dealing with uncertainty and variability
- pro-active rather than re-active management
- better allocation and use of resources
- improved incident management
- reduction in loss
- improved stakeholder confidence and trust
- compliance with requirements/legislation

Assessment and Award Options

The course may be completed with or without assessment leading to a:

- Statement of Completion (workshop) or
- Statement of attainment* - BSBPMG415 (Cert IV Unit), BSBPMG517 (Diploma Unit) or BSBPMG616 (Advanced Diploma Unit)

* AGS assessment via Agreement with Australia Institute of Business and Technology (RTO [41138](#))

Course objectives

- Appreciate the content of a risk management plan
- Identify, analyse and treat risk via a risk register
